

Risk Assessment: Jacobs Ladder

Reviewed: May 2019

Next Review Date: May 2020

Assessment undertaken by: Chris Martlew, Senior Instructor

L = LOW M = MEDIUM H = HIGH

Hazards	Effects	Who might be effected	Risk		Methods to Avoid/Reduce Risk
			Likelihood	Consequence	
Jacobs Ladder					Jacobs Ladder
Falling	Death, serious to minor injuries to the group or individuals.	All	L	H	<p>Clear safety brief given by trained instructors</p> <p>Climbers are to be attached to a safety rope at all times.</p> <p>There must be a minimum of 2 belayers on each rope at all times.</p> <p>Instructors are to check the fitting of harnesses and helmets</p> <p>It is critical to make sure tension in always maintained on the belay ropes.</p> <p>The instructor is to have a hands on approach while supervising the lower off - one climber at a time, keeping the speed under control.</p> <p>The instructor is to end the session if safety is compromised at any point.</p>
Belayers slipping	Back/neck injury, sprains, bruising, and cuts. Injury to climber.	Individual	M	L/H	<p>Clear safety brief given by instructor</p> <p>The instructor is to have a hands on approach supervising the lower off, one climber at a time – keeping the speed under control.</p> <p>Ensure belayers are focused.</p> <p>Check ground is clear of debris and not slippery.</p> <p>Belayer should be attached into the system, to limit movement.</p> <p>Tension should be maintained on the belay line at all times.</p>
Panic attack	Shock, bruising, asthma	Individual	L	M	<p>Participants must carry relevant medication</p> <p>The instructor is to ensure they have a first aid kit on session.</p> <p>All rescues must be carried out in accordance with site specific procedures</p>
